Tristan Blythe editor, Charity Finance

Join us at the inaugural ESG Imperative conference taking place on 31 March 2022.

We have developed this new event in response to the extraordinary times we find ourselves in. We believe that now is the time to start thinking beyond our immediate challenges to build sustainable organisations that are fit for the future.

The world has changed beyond measure. The global economy is rebuilding and reshaping in response to the colossal shock of the Covid-19 pandemic. The world appears to be losing the war against climate change and social and humanitarian crises are unfolding and intensifying across the globe. There is a growing awareness that organisations have a personal accountability to consider their social and environmental footprint and to behave responsibly. But what does this really look like? Our agenda

has been put together with these complex issues in mind, with the aim of creating a space where challenges, progress and ideas can be shared openly.

From navigating the complex world of responsible investment, through to the business case for championing equality and diversity, our broad range of speakers will consider the myriad of ethical challenges facing today's leaders. We also consider what the charity sector might learn from the corporate sector's adoption of ESG values and reporting structures, and how we might tap the hidden potential of civil society to help create a better world.

We hope you will join us for what promises to be an inspiring, practical and thought leading conference.

Who should attend The ESG Imperative?

Programme

09:30 Welcome from Tristan Blythe, editor, Charity Finance 09:35 Opening Address - The ESG Imperative for Charities - looking beyond investment The global impact of the Covid-19 pandemic and the accelerating climate crisis have changed the fabric of society, and caused many organisations to reevaluate how they operate. There are increasing pressur not doing any harm to others in the pursuit of their charitable objectives. This session will delve beyond the application of ESG factors in investment to explore:

11:55 Panel: Beyond COP26 - creating sustainable organisations that are fit for the future	
If we are to win the race against catastrophic climate change, we are in dire need of rapid collective action. But when the reality is that many charities are operating under immense pressure and on limited res	sources, what practical steps can they take to help tackle climate change? What does a
meaningful sustainability strategy look like, and how can organisations commit to net-zero carbon targets that are realistic and achievable?
